

# China Communications

## Zhe Zhang

# Chapter 2: Communication Network Structure

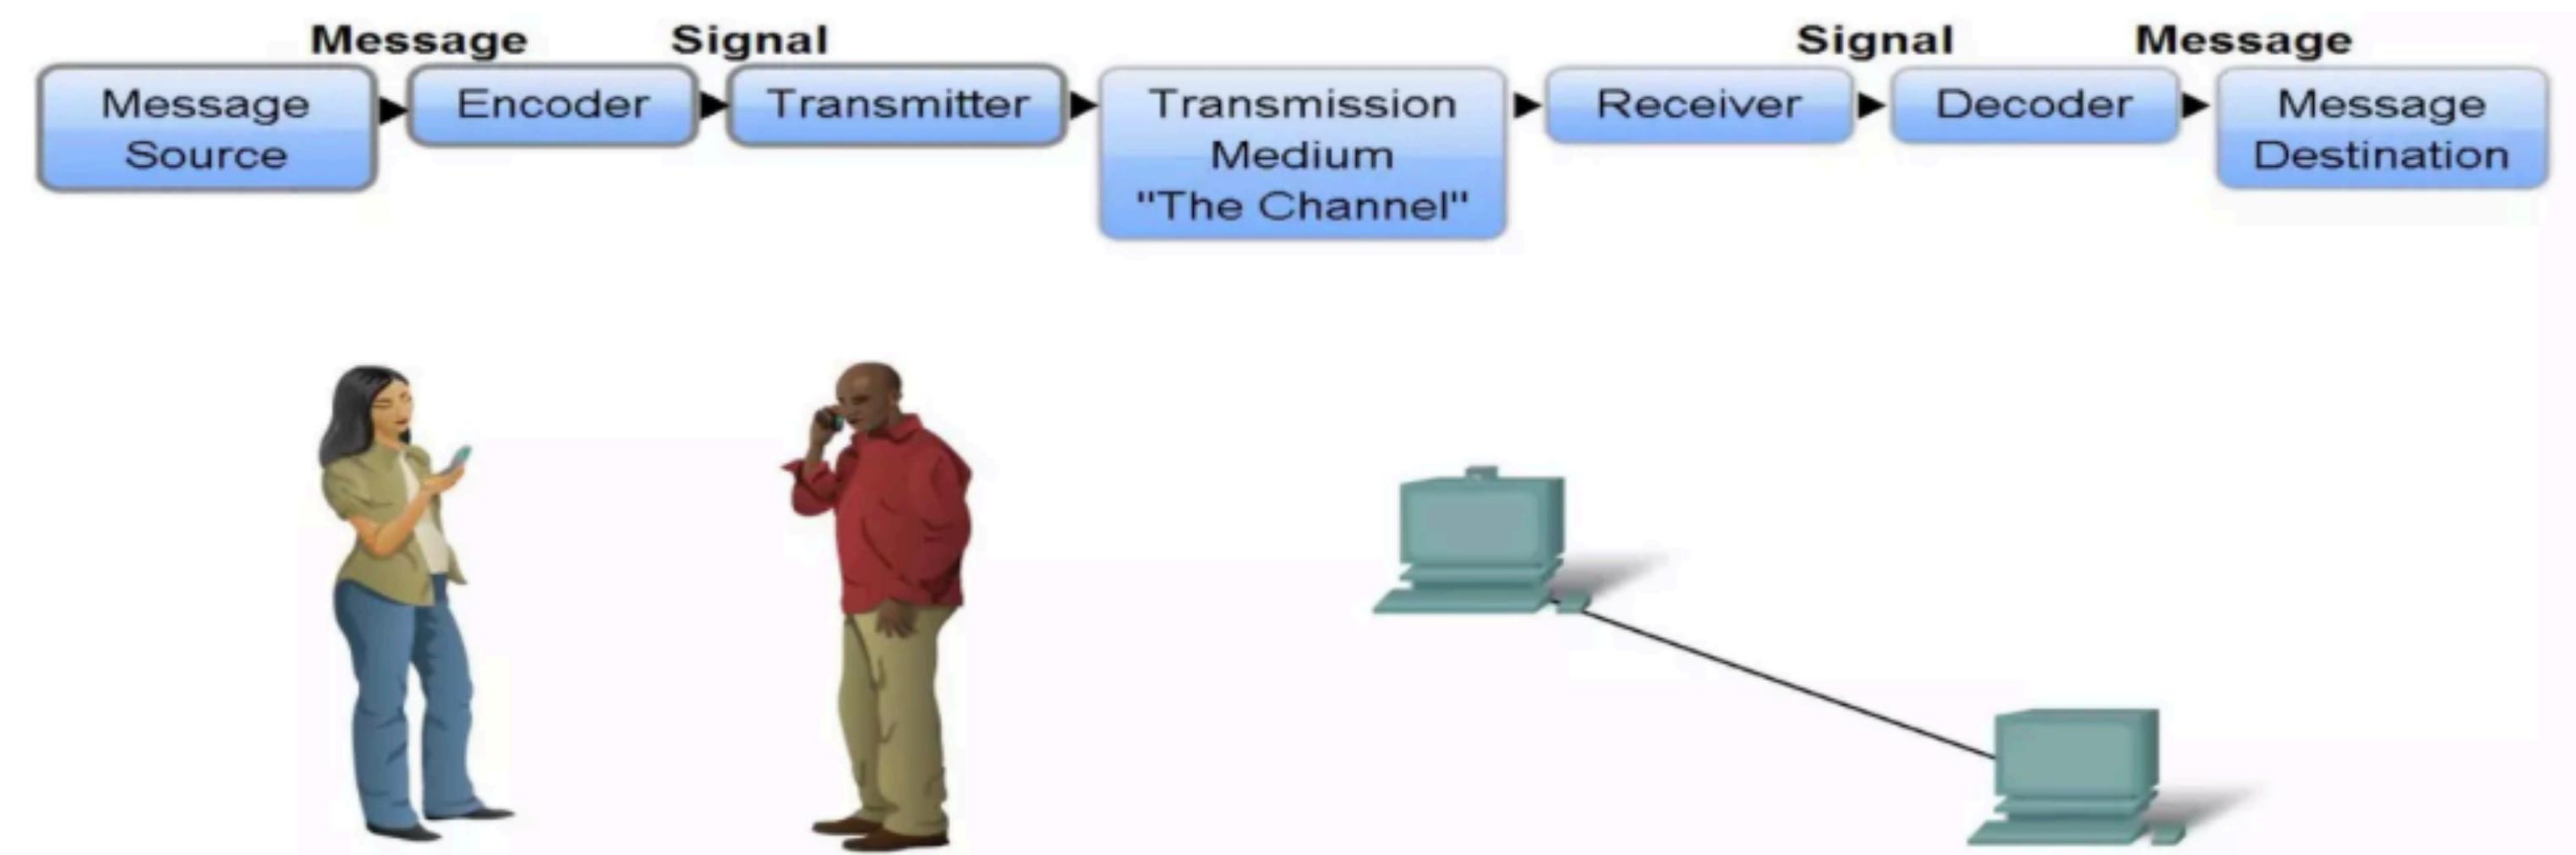

# Basic Concepts of Communication Network

## Define a network

- Data or information networks capable of carrying many different types of communications

- Key elements:

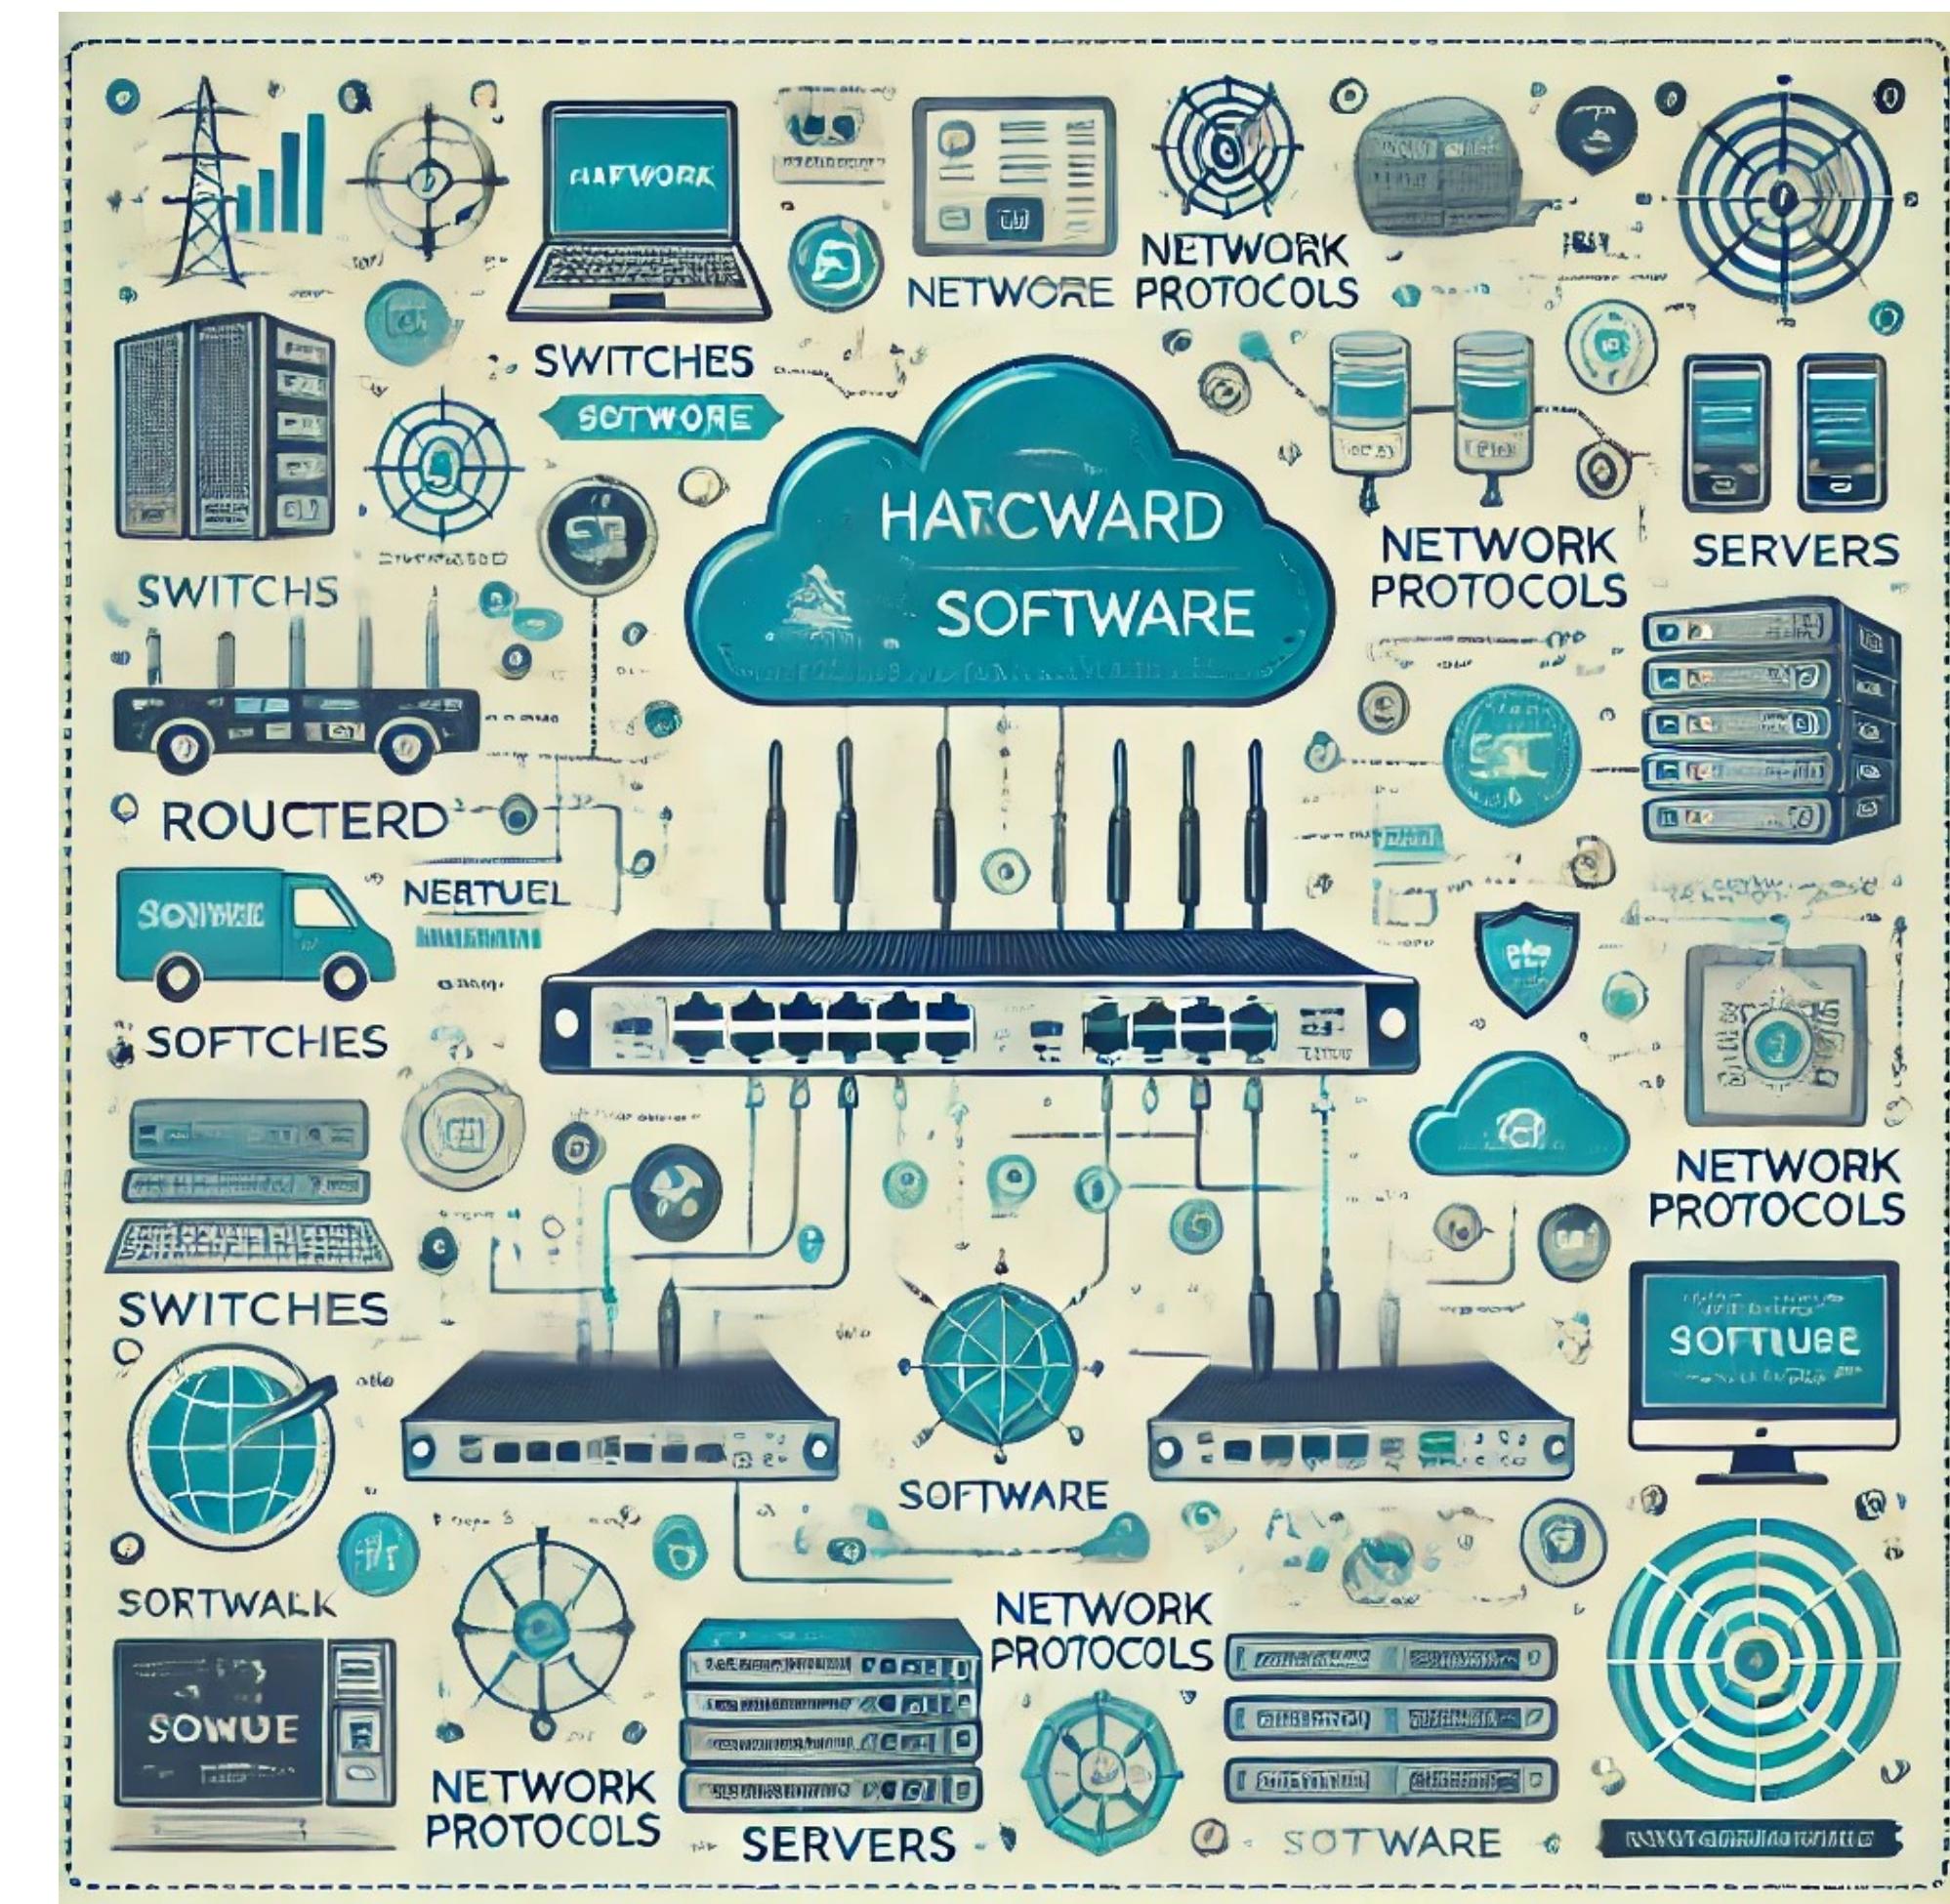

- message source
- the channel
- message destination

# Basic Concepts of Communication Network

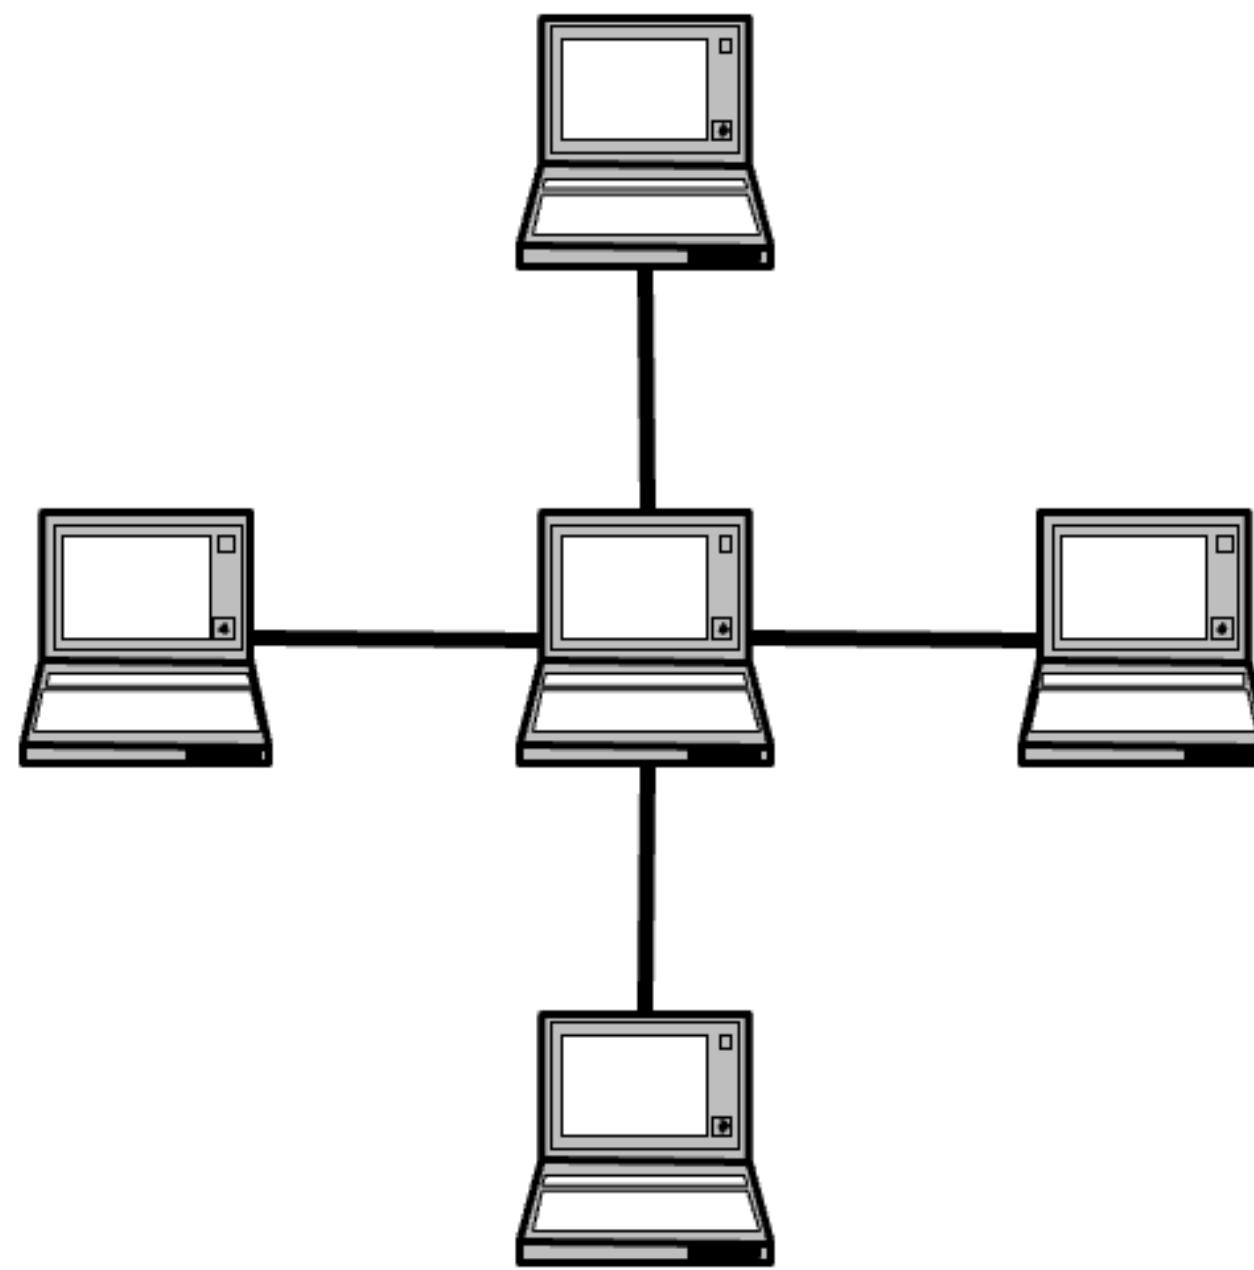

# Components of a network

- Network components:
    - hardware
      - nodes, links
    - software
      - protocols

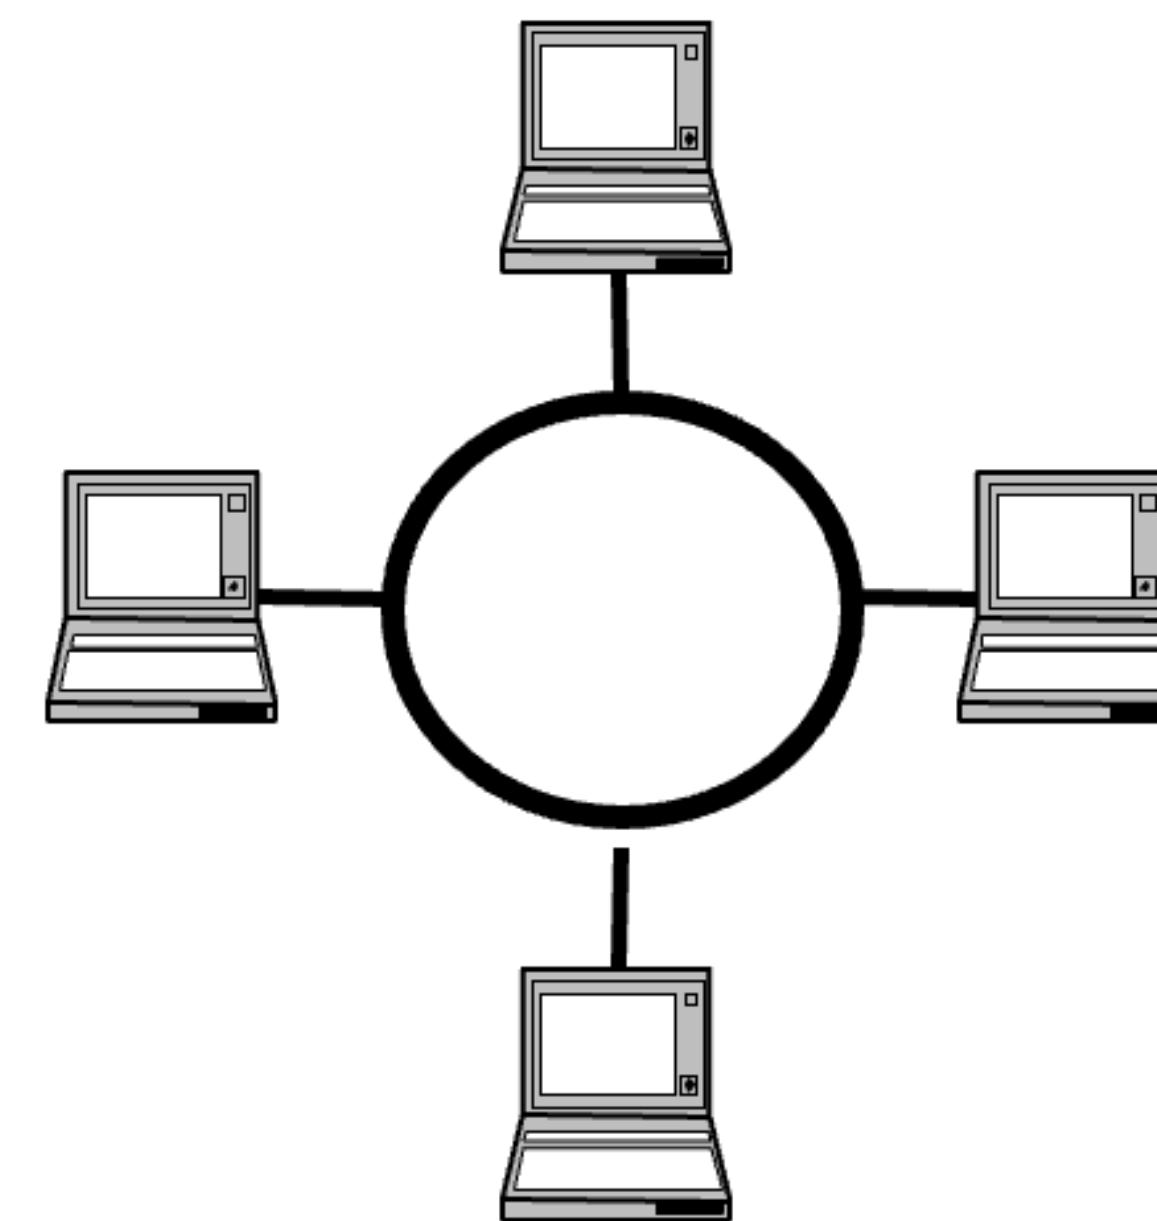

# Basic Concepts of Communication Network

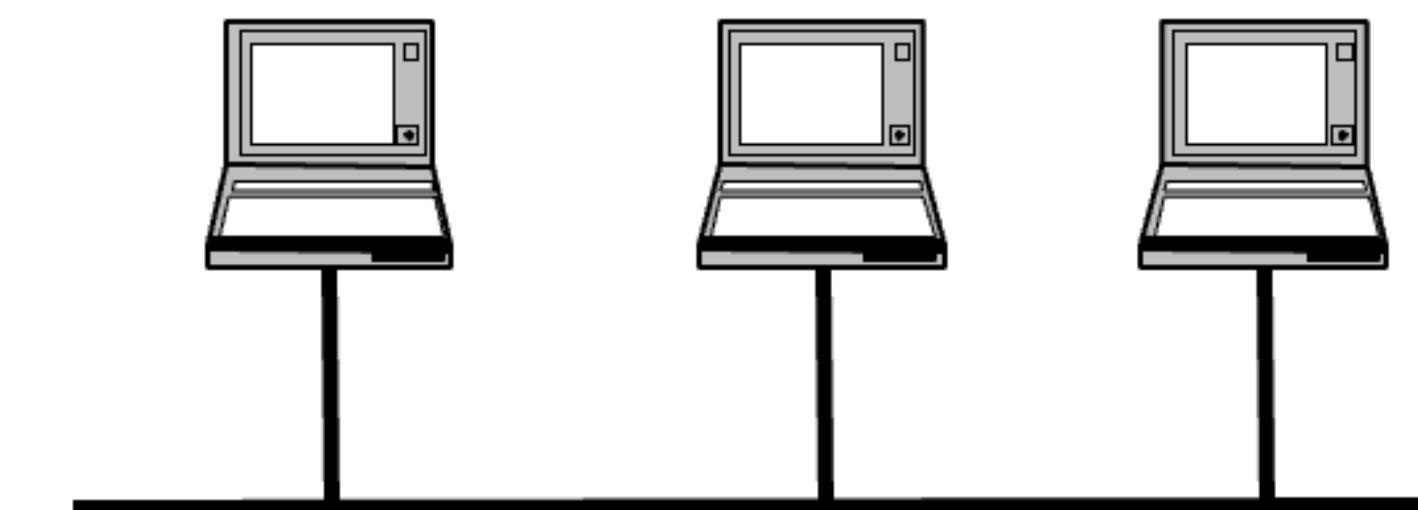

## Topology

Star Topology

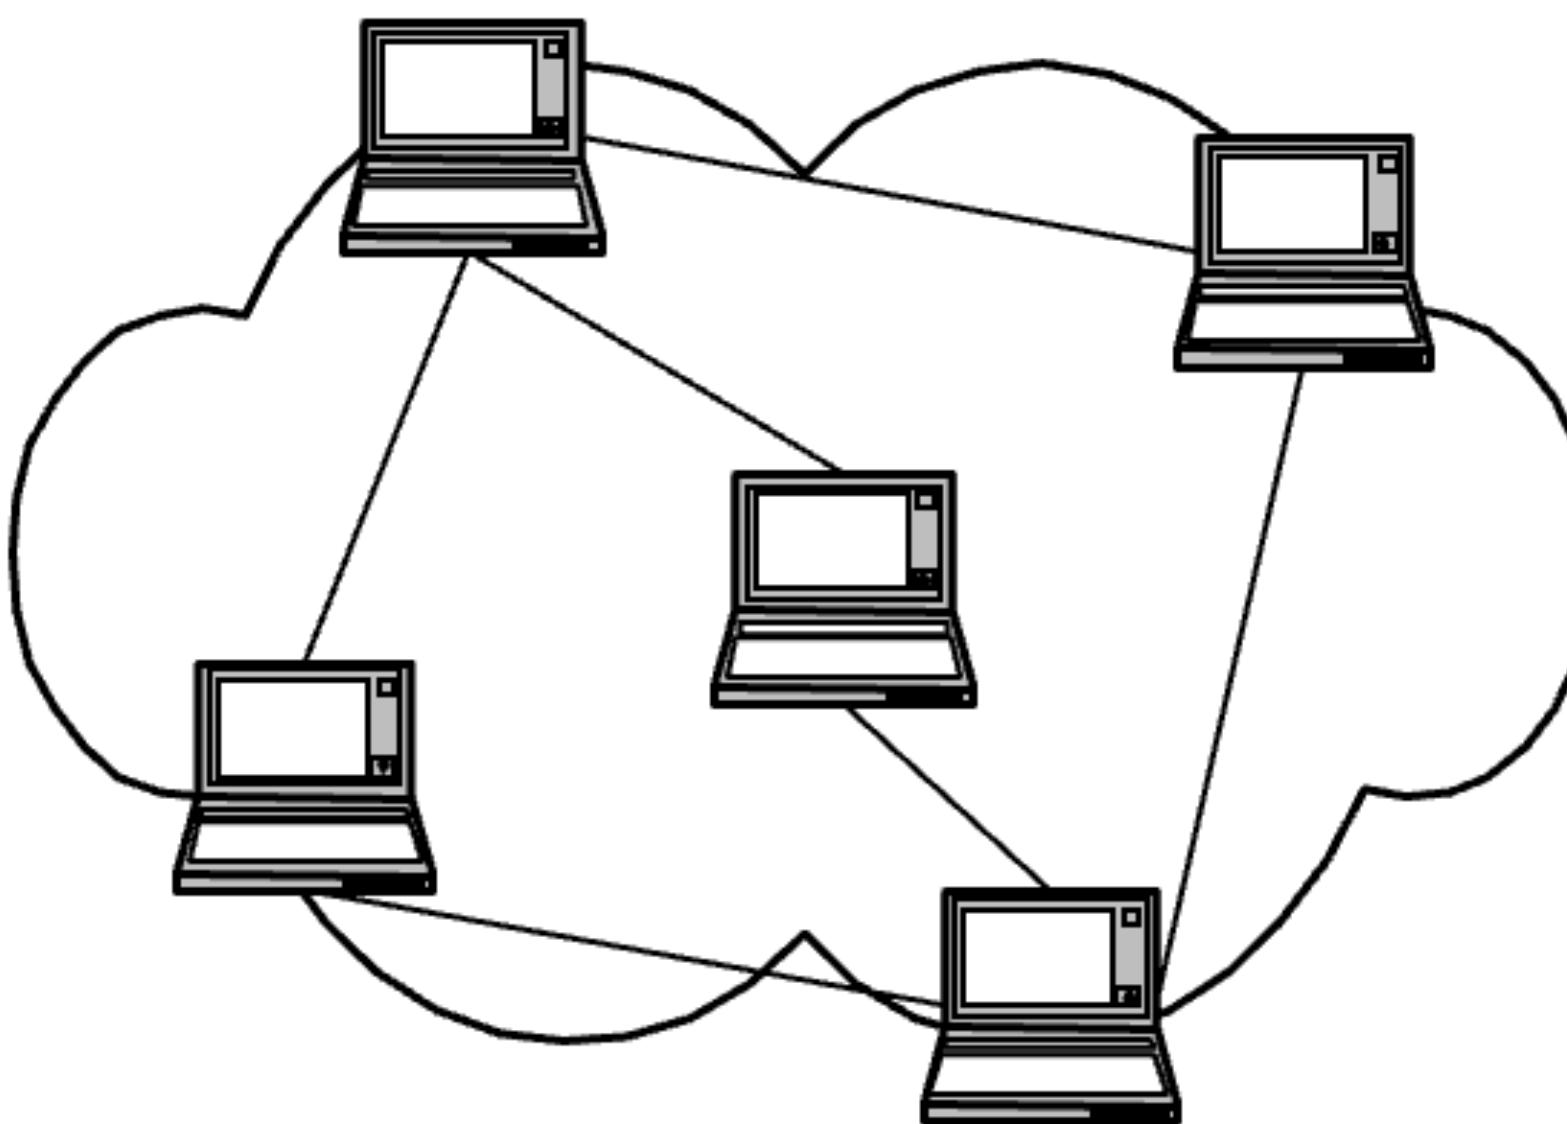

Ring Topology

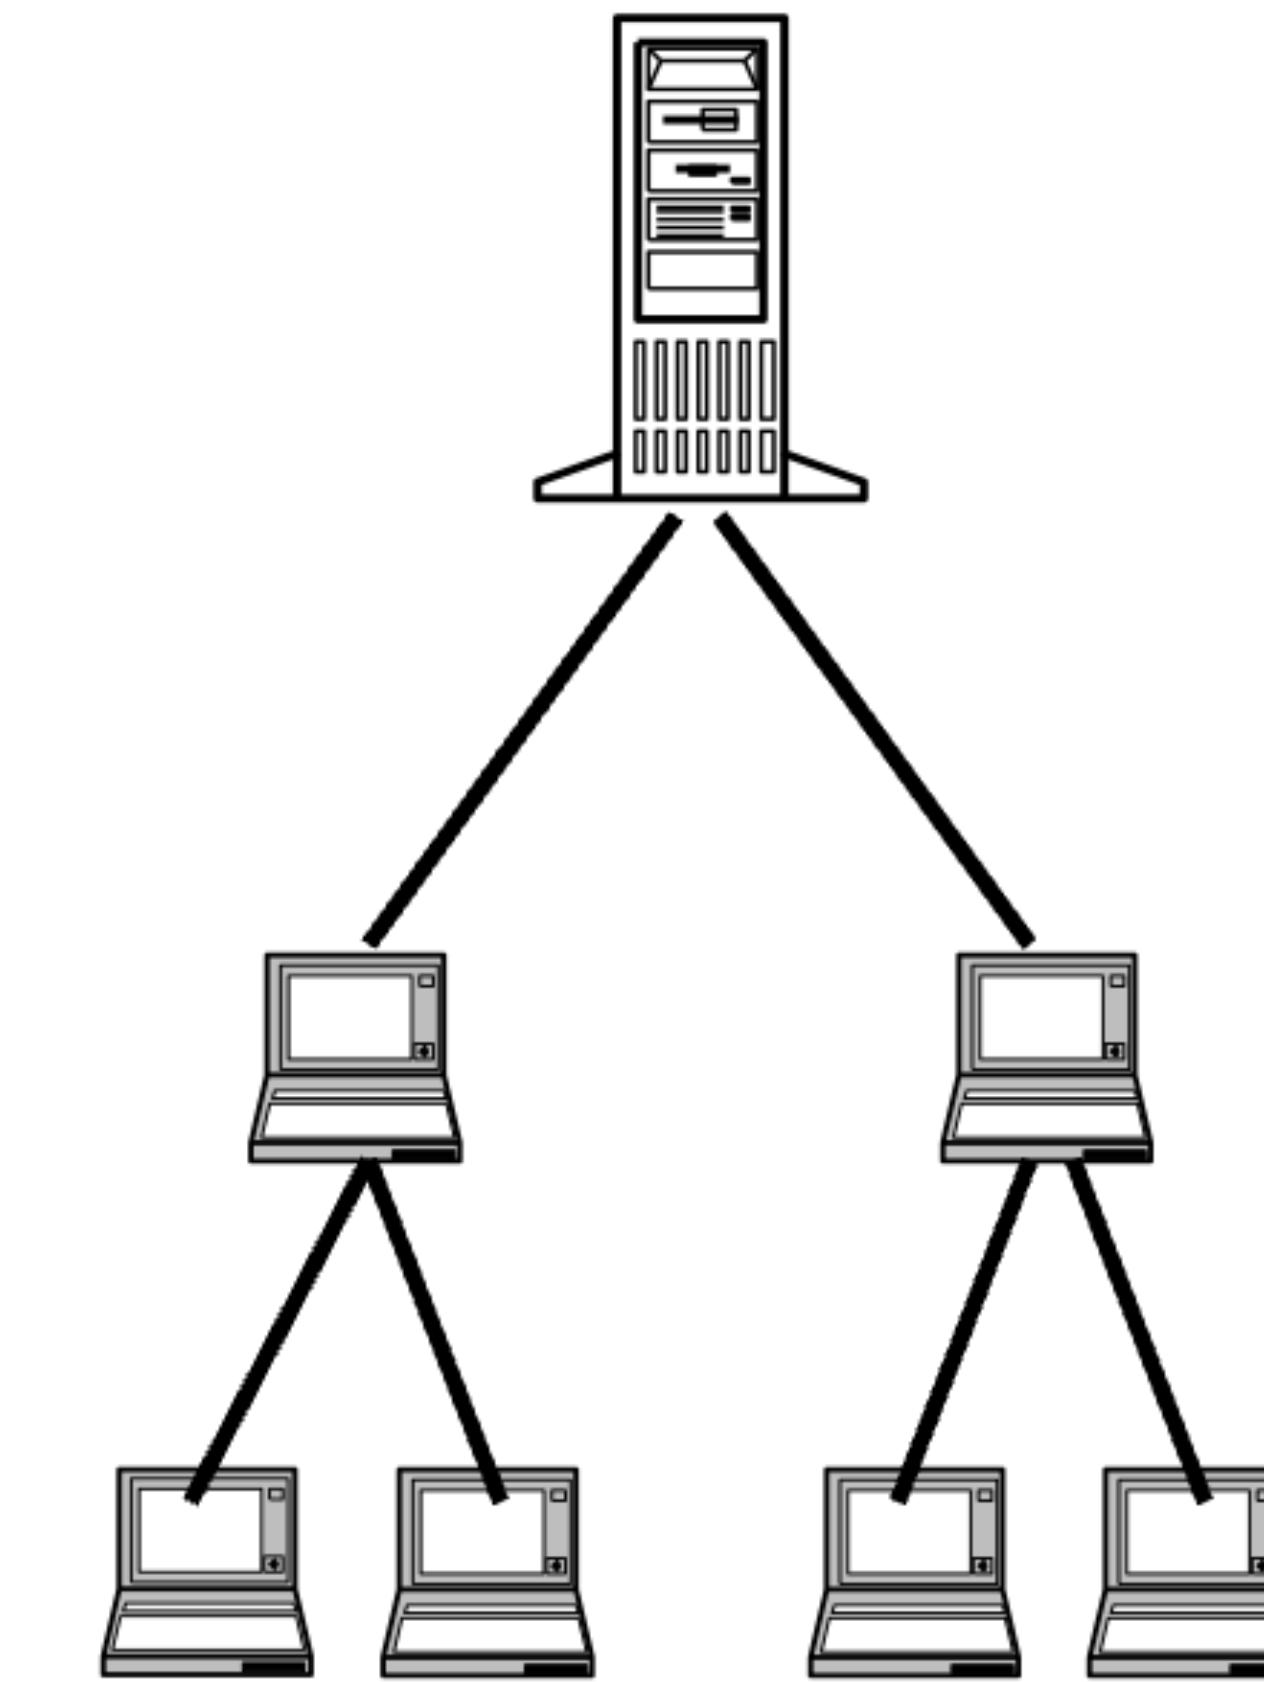

Bus Topology

# Basic Concepts of Communication Network

## Topology

Mesh Topology

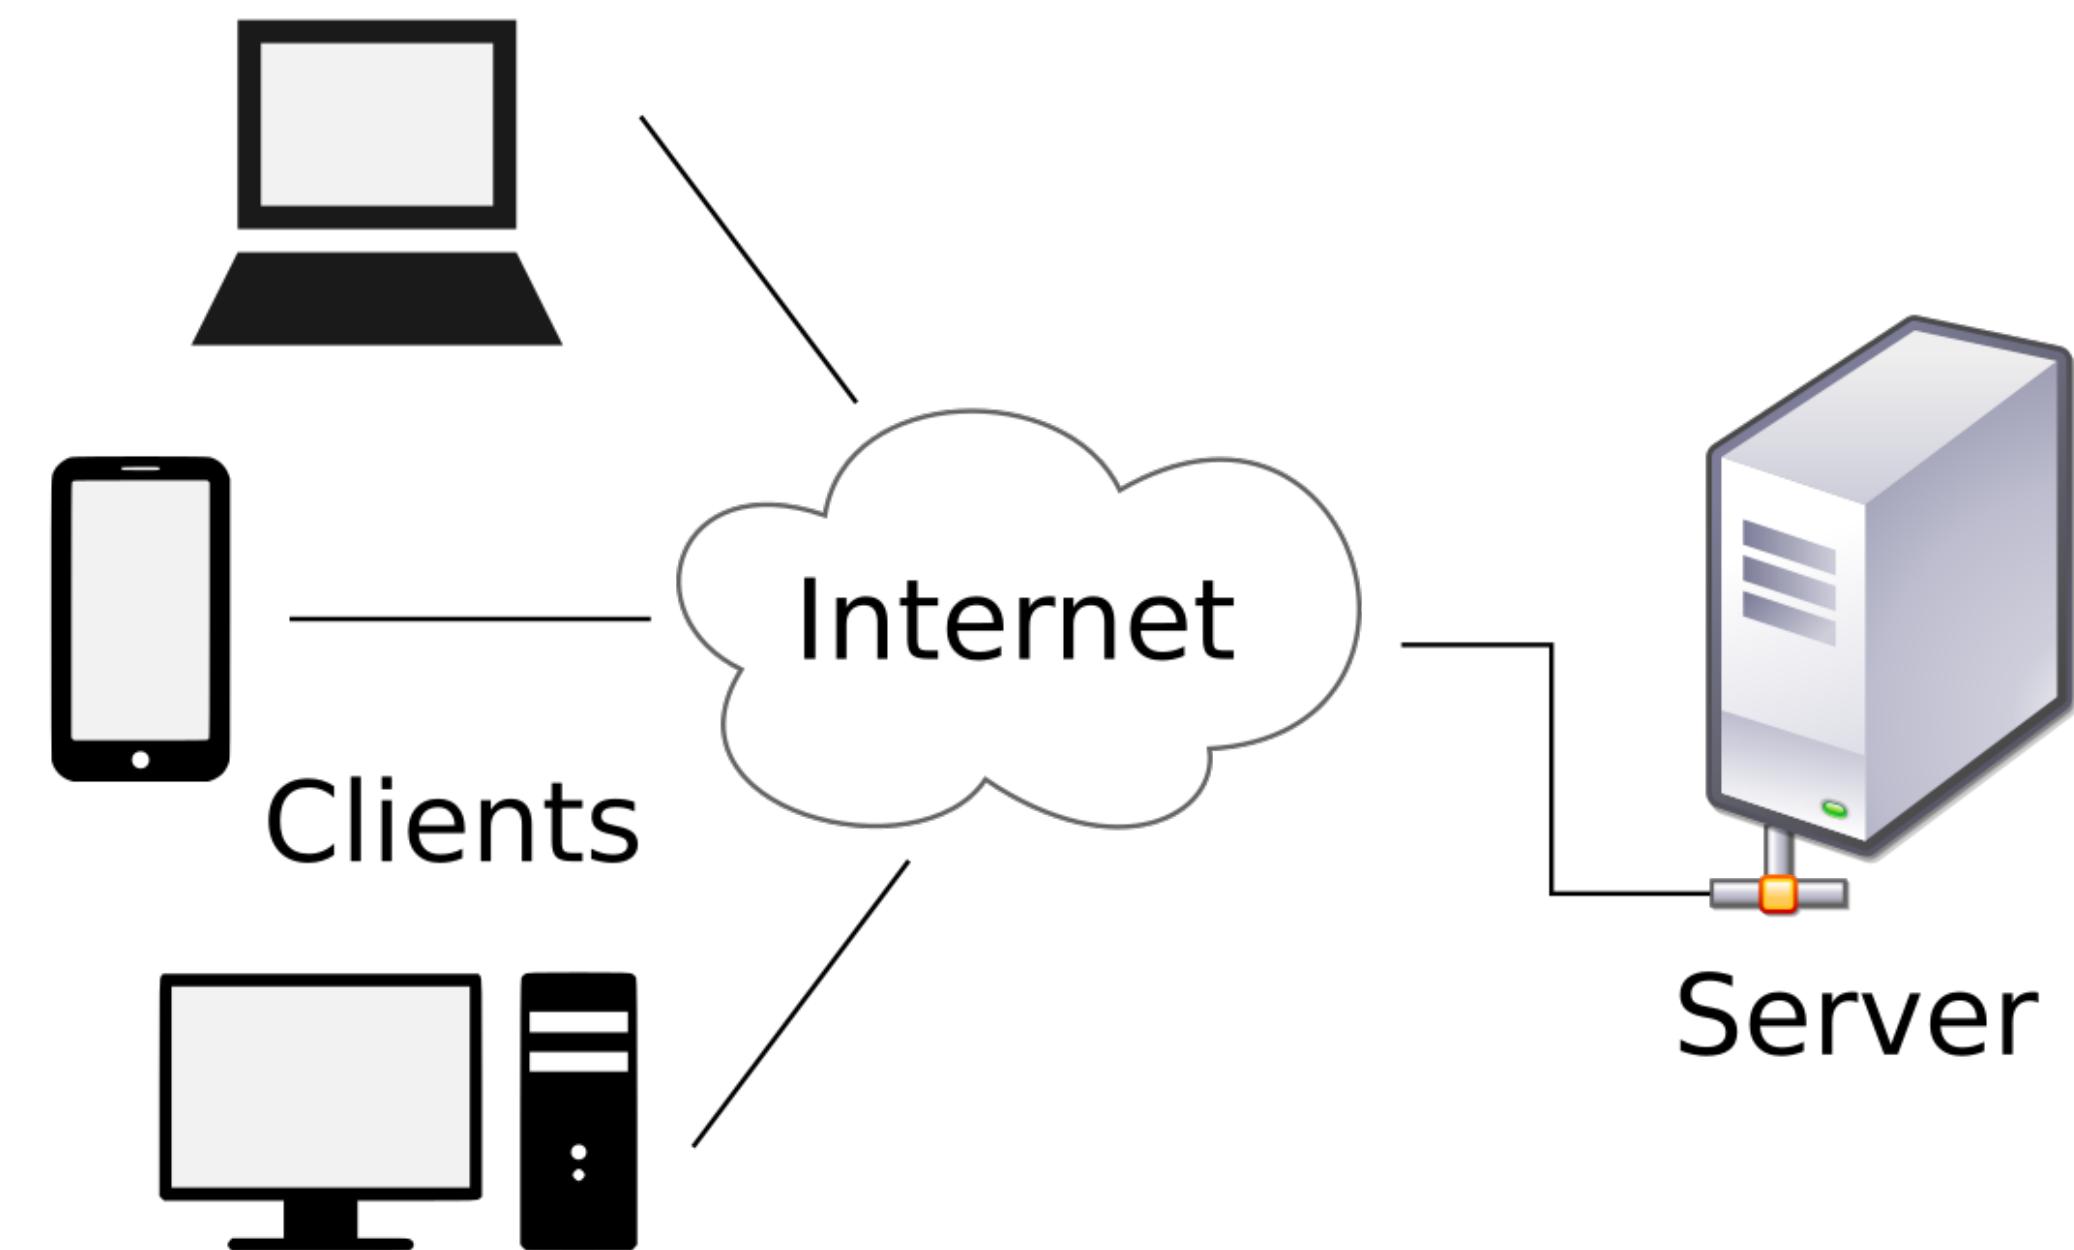

Tree Topology

# Basic Concepts of Communication Network

## End device

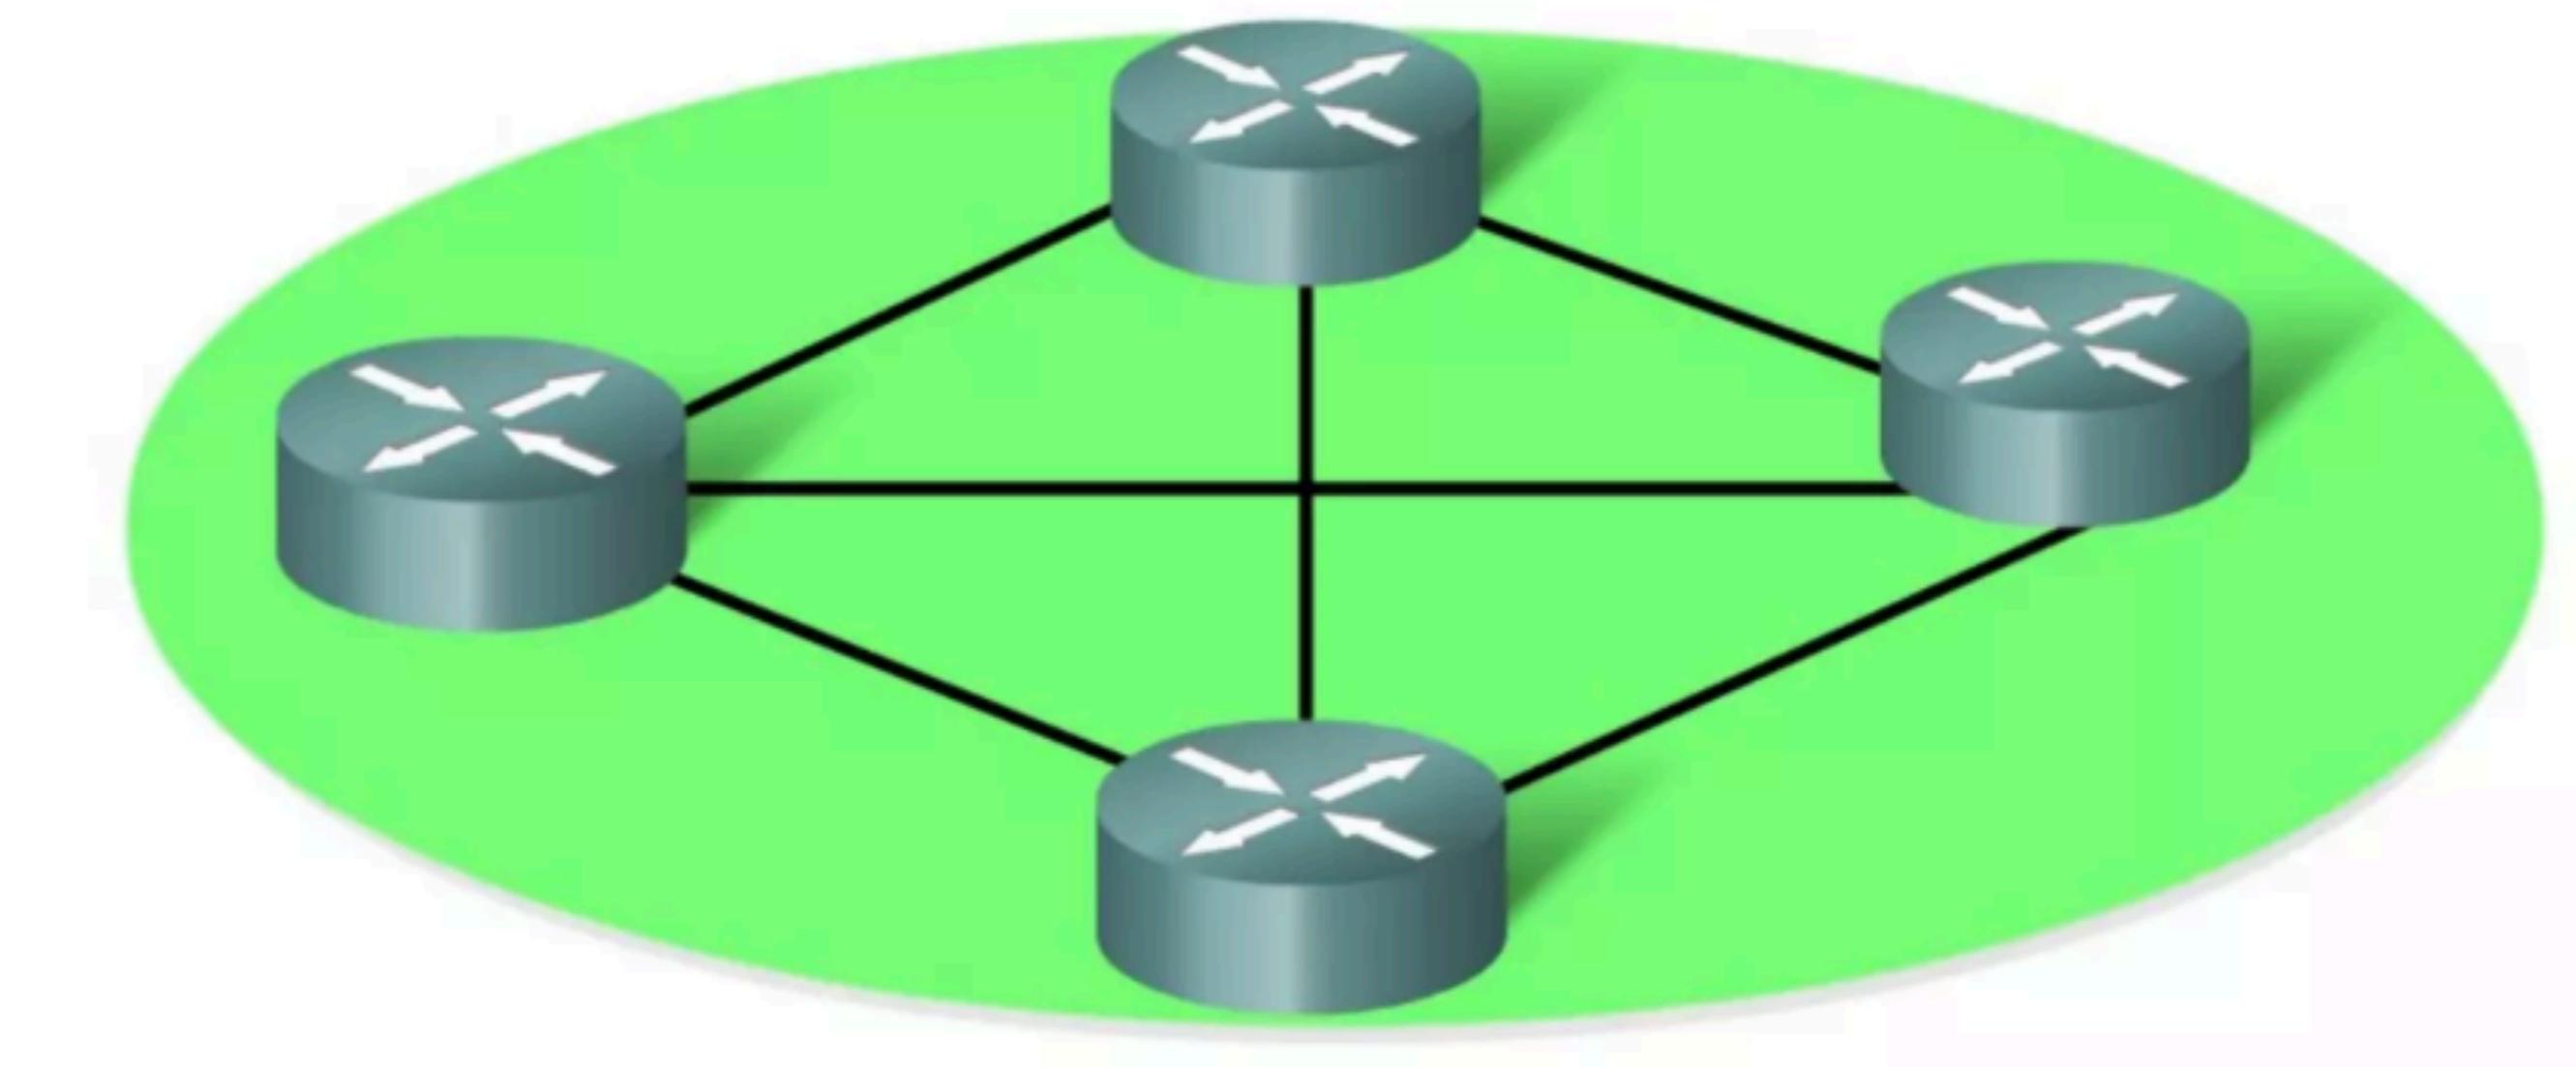

- End devices form interface with human network & communications network
- Role of end devices:
  - client
  - server
  - both client and server

# Basic Concepts of Communication Network

## Intermediate device

- Role of an intermediate device
  - provides connectivity and ensures data flows across network

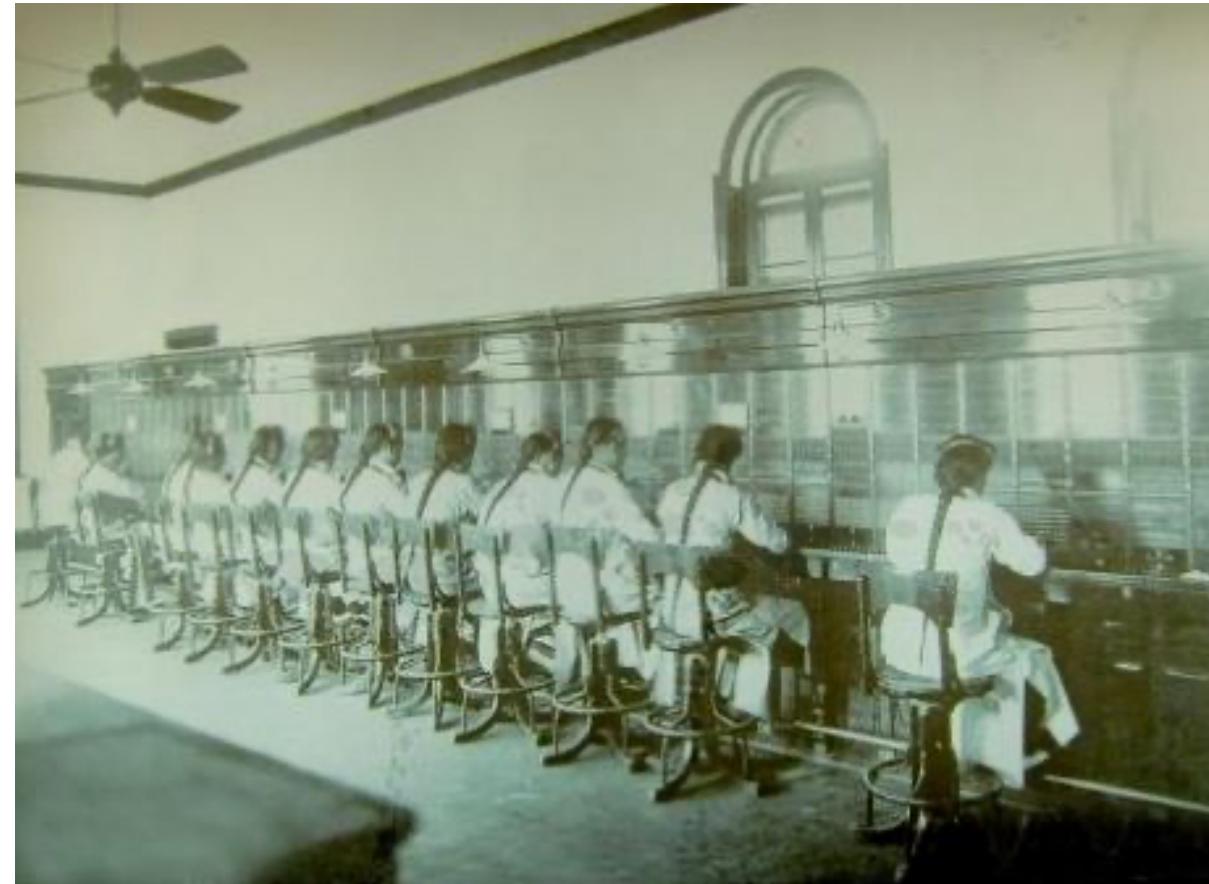

# Evolution of Communication Networks

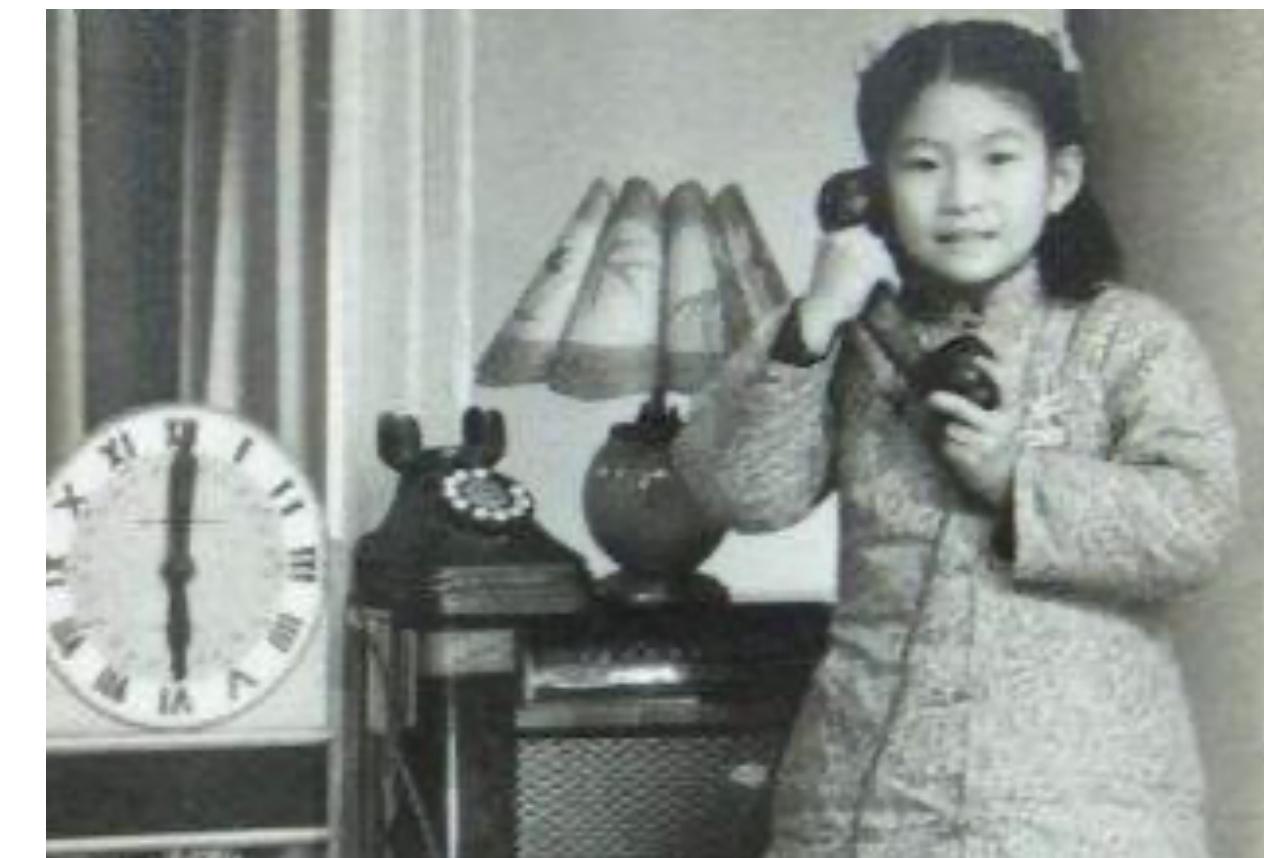

## Early Stage

Postman

Switching Office

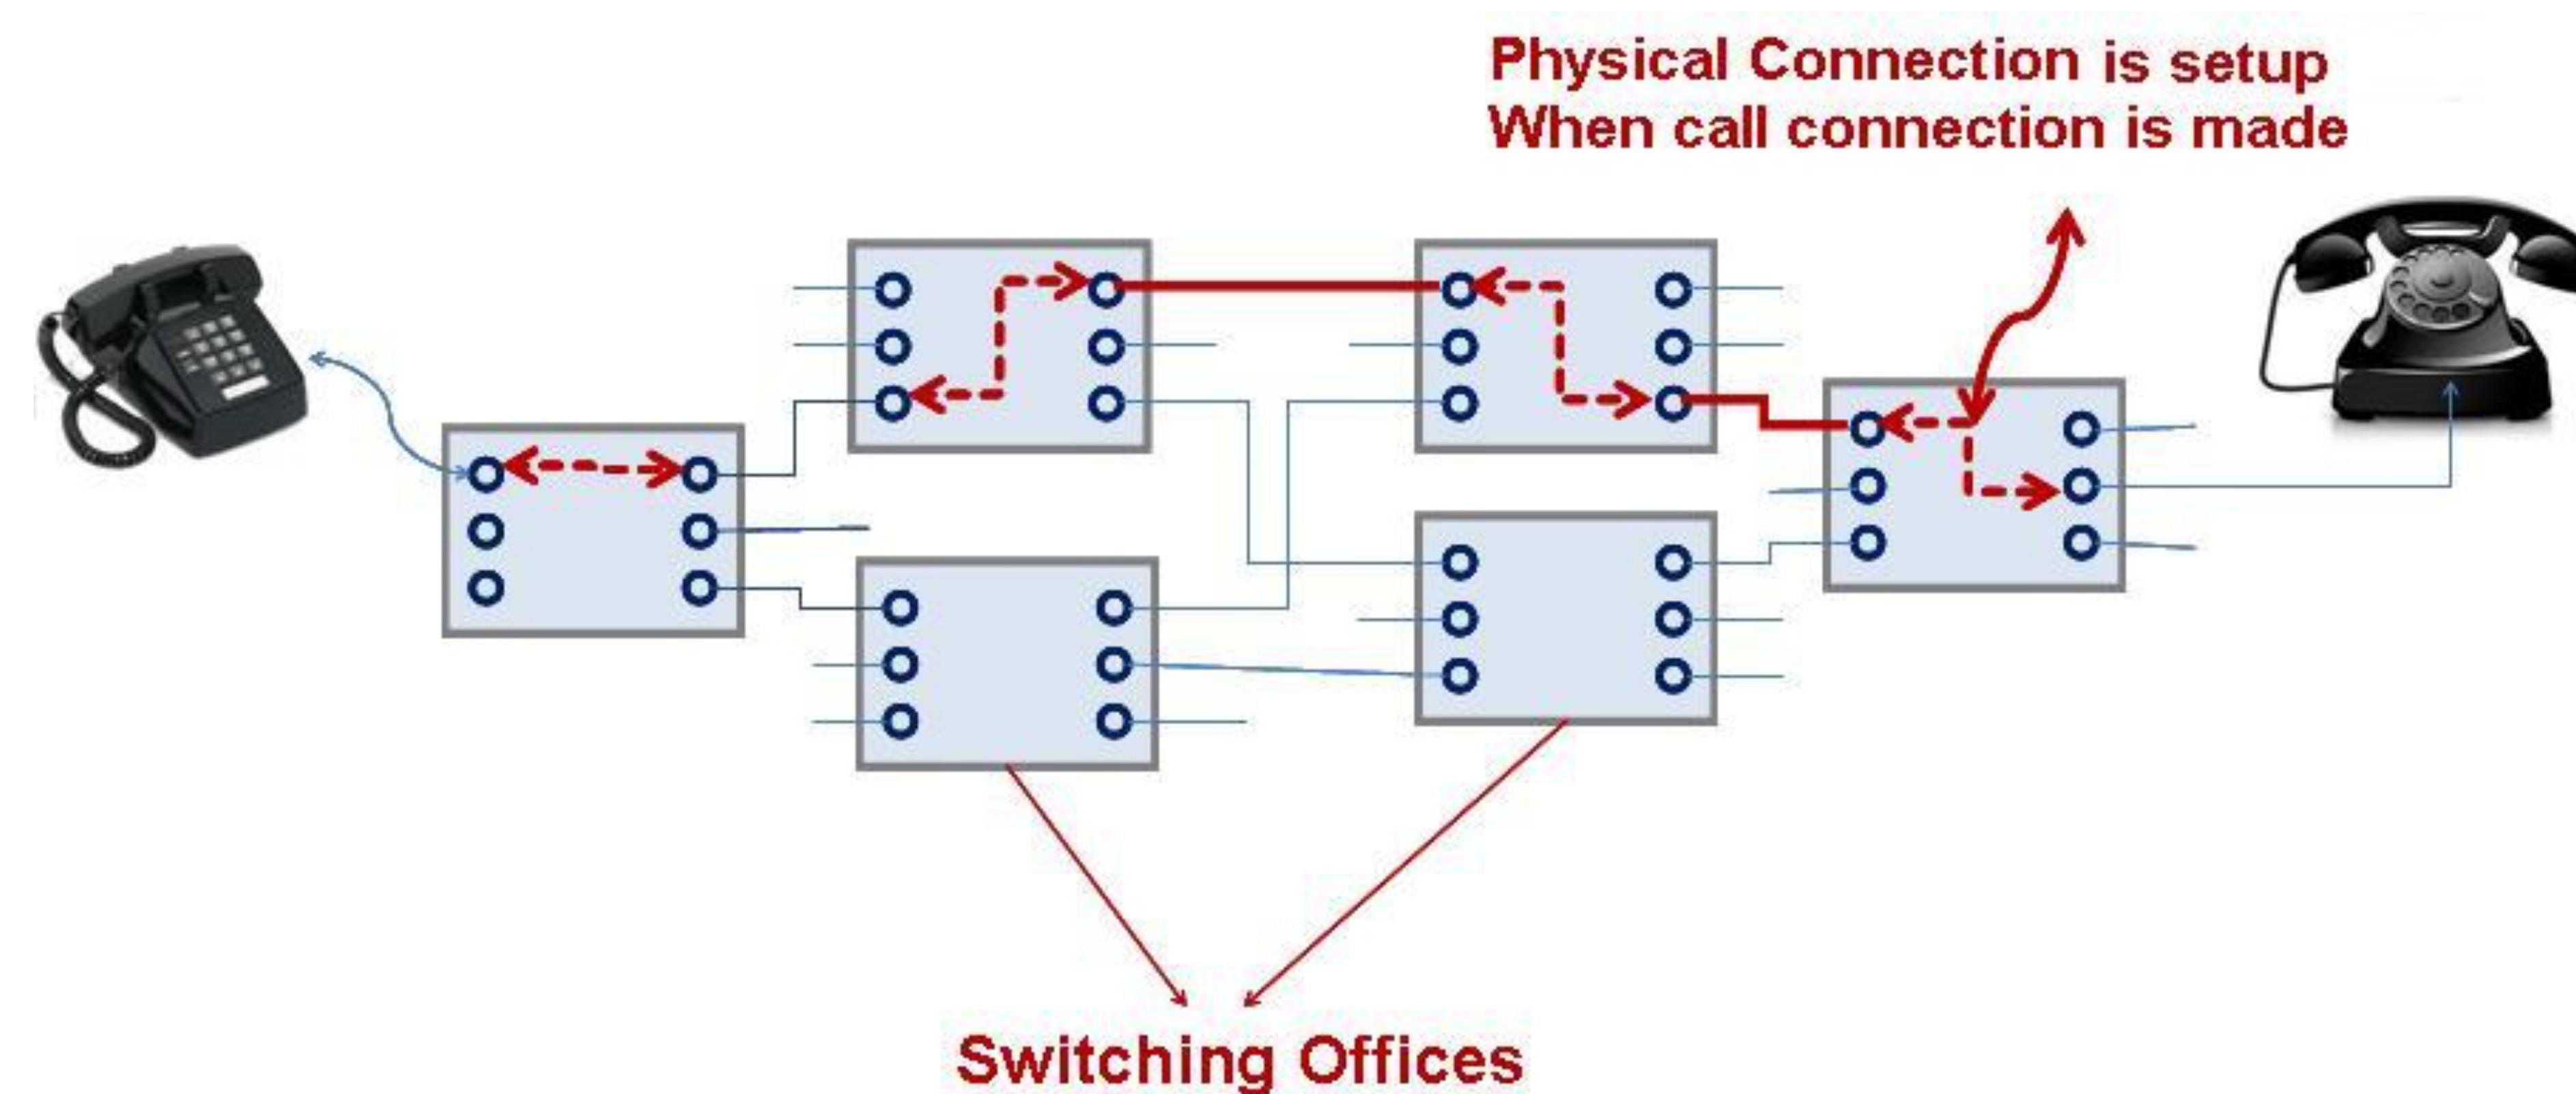

Telephone

First telegram in China: 1871

First telephone call in China: 1882

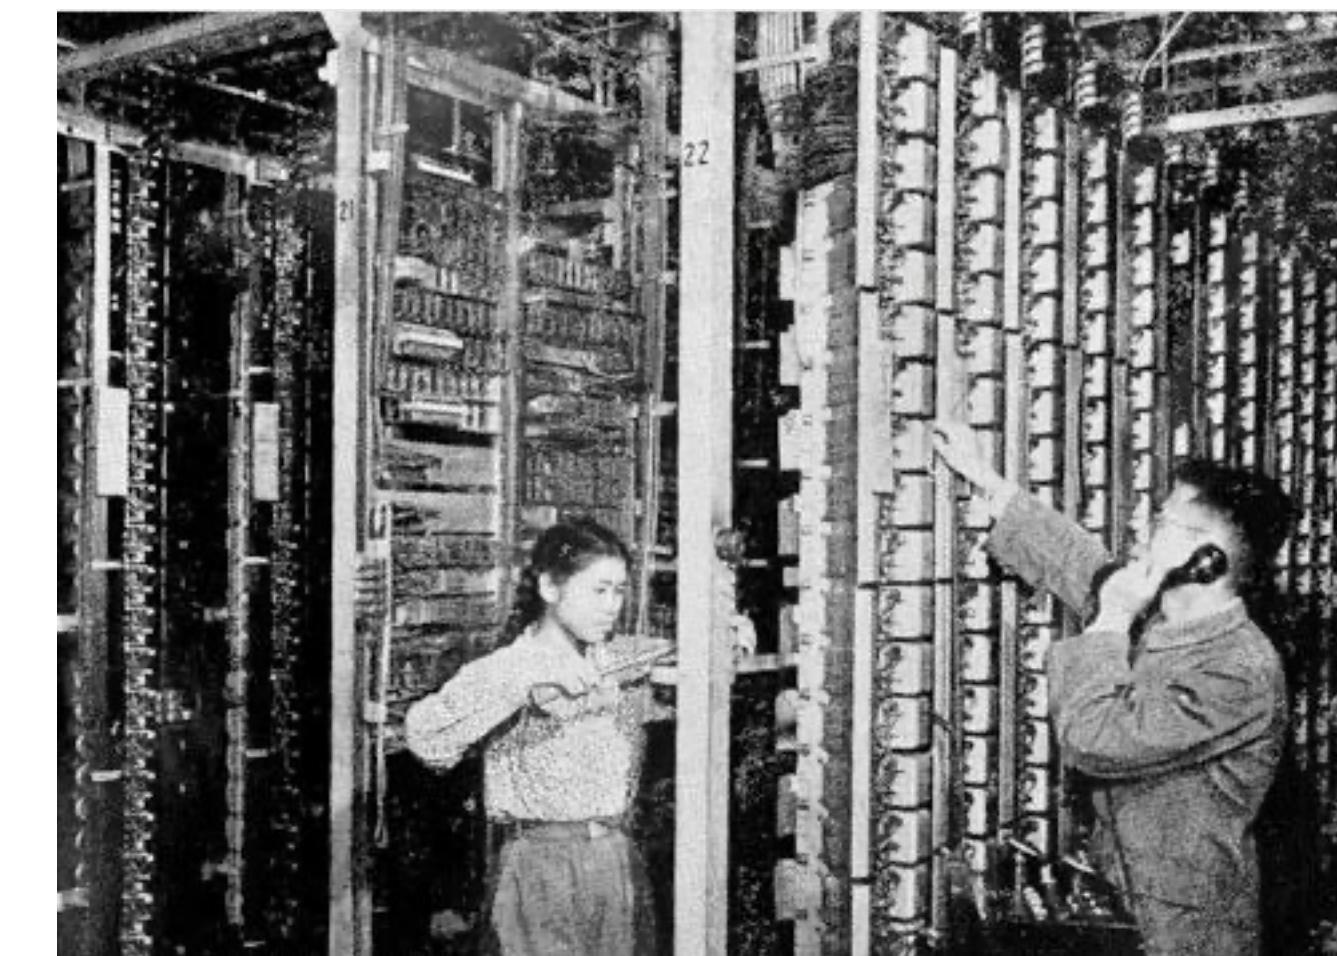

# Evolution of Communication Networks

## Early stage

# Evolution of Communication Networks

1900s

Manually Switching

Crossbar Switch

The crossbar switch system is an electromechanical switching system used in telephone exchanges before the advent of electronic and digital systems

# Evolution of Communication Networks

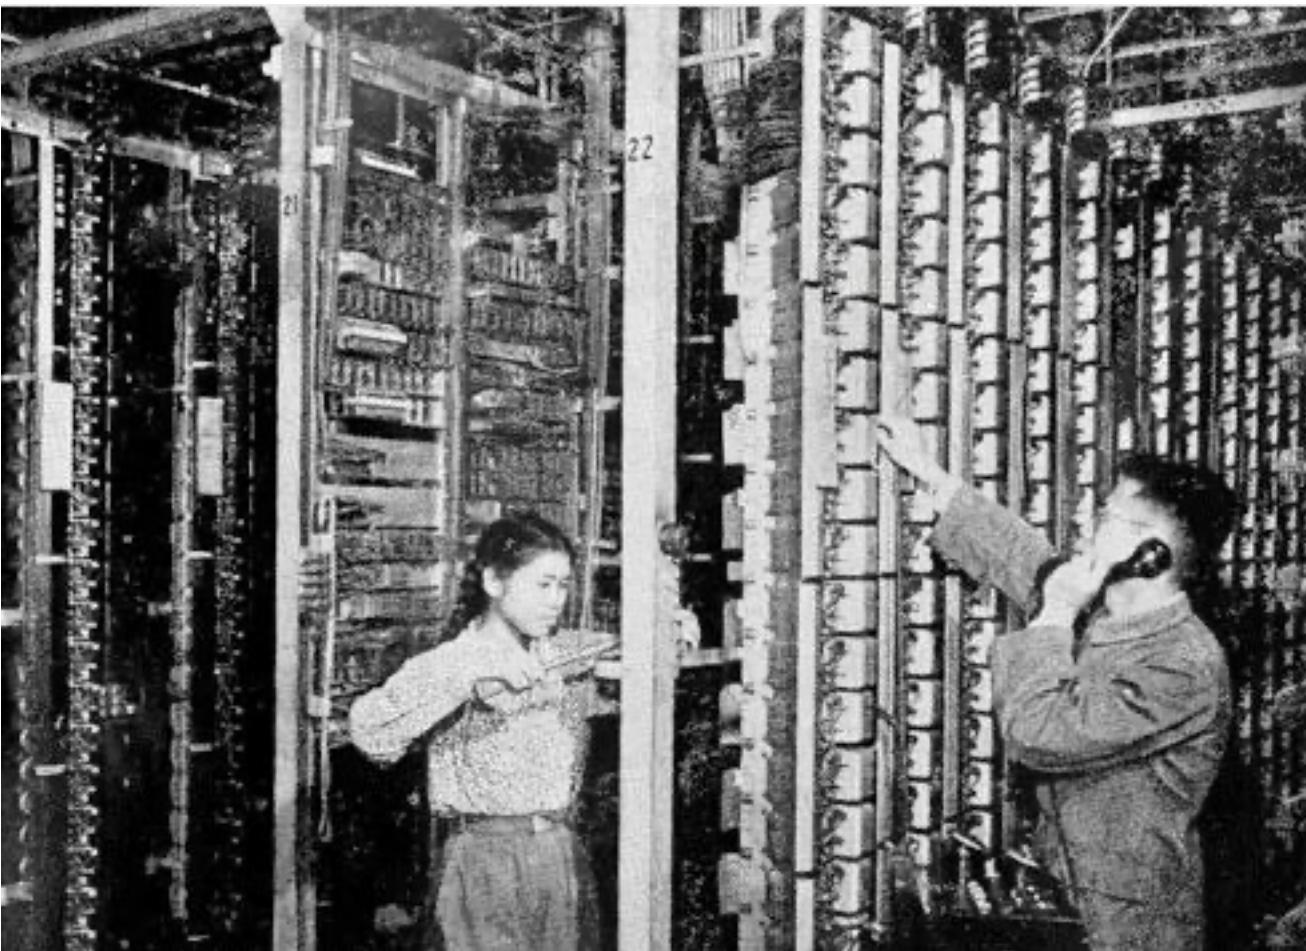

1900s

- NJUPT:
  - Established in 1958

# Evolution of Communication Networks

Late 1900s

Crossbar Switch

- The switching system is controlled by a computer program stored in a memory in the switching system

Stored Program Control

# Evolution of Communication Networks

## Mobile phone era

Mobile Phone

Switching Server

# Evolution of Communication Networks

## Mobile phone era

Nokia Dominating Time

ADSL

# Evolution of Communication Networks

New century

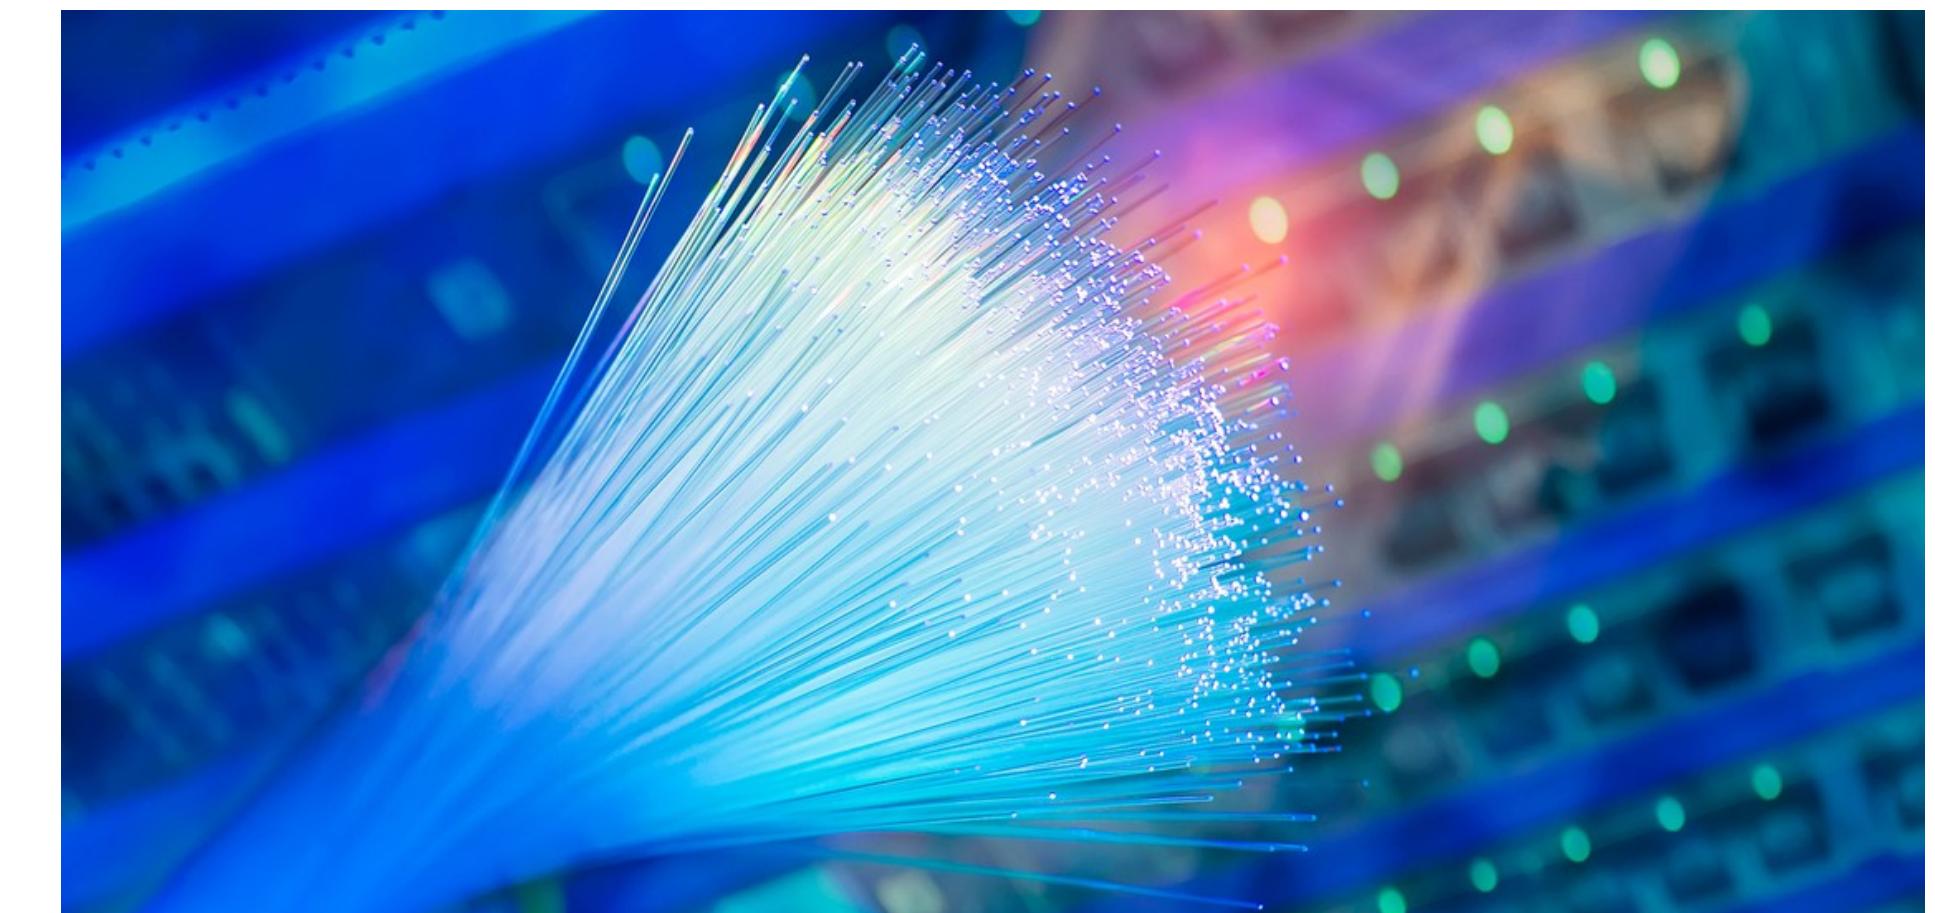

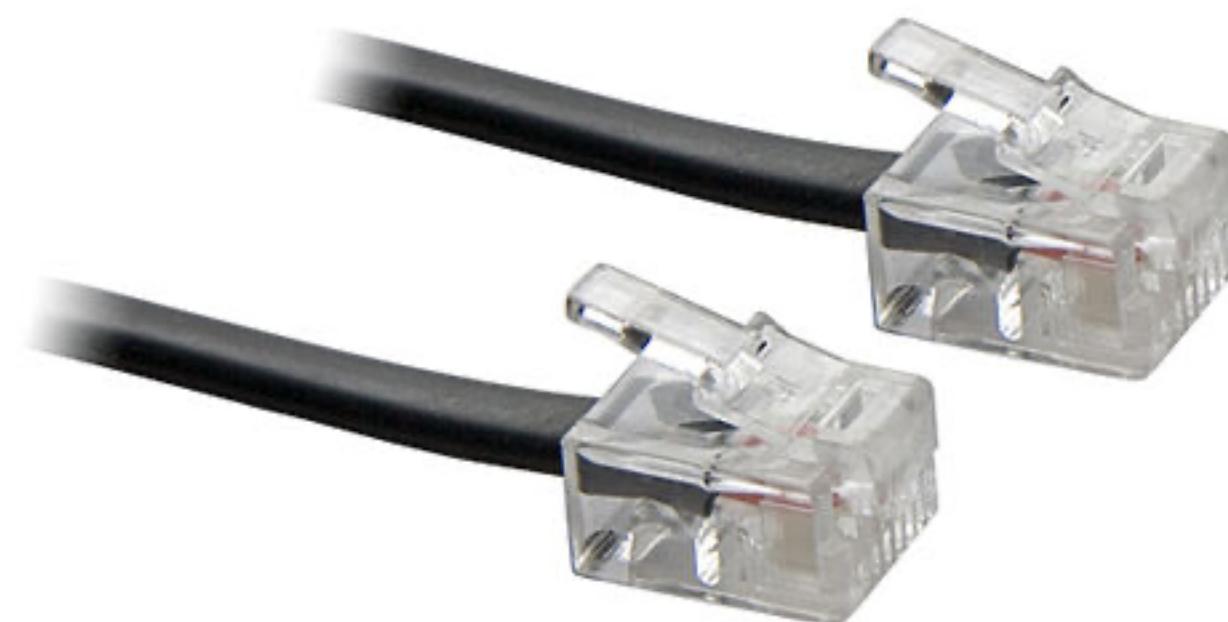

Nokia

Smart Phone

# Evolution of Communication Networks

New century

ADSL Twisted Cable

Optical Fiber

# Evolution of Communication Networks

New century

From 2G to 5G

# Group Discussion

**Share your country's communication history**

- Group size: 3-5 person
- Discussion time: 5 mins
- Each group needs one representative to share your country's communication system history, and present your findings or conclusions from the history.

# Thank You
